

## Paper Assignments: *Watersheds*

GST 110-U

Spring, 2002

As listed in your class schedule, we will be discussing Chapters 1–10 of *Watersheds 3* in class during the semester. Each chapter presents a case study on some significant environmental issue, going into greater depth than is possible for instant news reporting, e.g., for newspaper or television coverage.

For each Chapter, I want you to submit a 3–5 page paper (worth ten points) that

1. Summarizes the issue.
2. Takes a side and makes a case for that side.
3. Cites at least two references besides *Watersheds*.

Each chapter has questions before and after the case study that should help you to focus on the pertinent issues, as well as an extensive listing of references. As always your papers should be word-processed, spell-checked, double-spaced (have pity on my poor eyes), and of course, well-written. Feel free to discuss them with me and with the good folk at the Writing Center (Mooney, Second Floor).
