

Term Paper

Math 371-A

First Draft: Due January 19

Final Draft: Due January 25

You are to identify a topic in mathematics, and write about it in detail. The purpose of this paper is for you to demonstrate your ability to write a structured, lengthy document about mathematics. Given that, any topic in mathematics will suffice.

The paper is to be at least ten pages long. It should contain an introduction, sections explaining the various components of your topic, a conclusion, and a bibliography containing at least two print references.

You are required to come in and discuss your proposed topic with me in conference on Wednesday, January 7. We will set the times of the conferences during class that morning.

Aside from the drafts, I will require you to bring in your work-in-progress during the semester for class discussion.
